FUNDACIÓN BIOFÍSICA BIZKAIA / BIOFISIKA BIZKAIA FUNDAZIOA

OFFER – 2 Post-doc position in the lab biophysics of morphogenesis
Publication date: July 11, 2019

Fundación Biofísica Bizkaia (FBB) is a center of excellence on an international level with the main aim of promoting a multidisciplinary program in the field of Biophysics and its application in the areas of Biotechnology and Health, focusing all its resources in Instituto Biofisika Institutua (UPV/EHU, CSIC).

Description of the position offered

The successful candidates will be joining Jerome Solon's laboratory at the Biofisika Institute, for a period of four months, starting September 1. The position would involve combination of experimental work and analysis to unravel the mechanism of epithelial organization and morphogenesis during *Drosophila* development.

Education and Experience Required

The candidate should have a PhD in biology or physics and experience in *Drosophila*.

Contact: Applicants are encouraged to send the next documentation through the Biofisika website contact page (<http://biofisika.org/contact/>), adding the following subject: [*Job Application: 46JSolon*]

1. Curriculum Vitae
2. Reference letters (if possible)

Deadline: July 31, 2019

Please note that due to the large number of applicants expected, it will not be possible to communicate the evaluation results to all the candidates.
