FUNDACIÓN BIOFÍSICA BIZKAIA / BIOFISIKA BIZKAIA FUNDAZIOA

OFFER – Student in practice - Graduated in Medical Laboratory Sciences

Publication date: August 6, 2019

Fundación Biofísica Bizkaia (FBB) is a center of excellence on an international level with the main aim of promoting a multidisciplinary program in the field of Biophysics and its application in the areas of Biotechnology and Health, focusing all its resources in Instituto Biofisika Institutua (UPV/EHU, CSIC).

Description of the position offered

Neuronal mRNA methylation and its role regulating Memory formation. Host lab: Molecular Cognition laboratory, directed by Dra. Shira Knafo. Our lab seeks to identify the molecular and synaptic mechanisms underlying learning and memory, utilizing a broad range of electrophysiological, molecular biology and imaging techniques.

Education and Experience Required

The candidates should have a Degree in Medical Laboratory Sciences and willing to spend some months in a cutting edge laboratory.

Contact: Applicants are encouraged to send the next documentation through the Biofisika website contact page (<http://biofisika.org/contact/>), adding the following subject: [*Job Application: 48SKnafo*]

1. Curriculum Vitae
2. Reference letters (if possible)

Deadline: August 20, 2019

Please note that due to the large number of applicants expected, it will not be possible to communicate the evaluation results to all the candidates.
