FUNDACIÓN BIOFÍSICA BIZKAIA / BIOFISIKA BIZKAIA FUNDAZIOA

OFFER – Graduated in Biology and Master in Biomedicine
Publication date: September 5, 2019

Fundación Biofísica Bizkaia (FBB) is a center of excellence on an international level with the main aim of promoting a multidisciplinary program in the field of Biophysics and its application in the areas of Biotechnology and Health, focusing all its resources in Instituto Biofísica Institutua (UPV/EHU, CSIC).

Description of the position offered

Maintenance of cells cultures, northern blots and southern blots Host lab: Molecular Cognition laboratory, directed by Dra. Shira Knafo. Our lab seeks to identify the molecular and synaptic mechanisms underlying learning and memory, utilizing a broad range of electrophysiological, molecular biology and imaging techniques.

Education and Experience Required

The candidates should have a Degree in Biology and MsC in Biomedicine. Experience in maintenance of cells cultures, northern blots and southern blots would be very positive.

Contact: Applicants are encouraged to send the next documentation through the Biofísica website contact page (<http://biofisika.org/contact/>), adding the following subject: [*Job Application: 51SKnafo*]

1. Curriculum Vitae
2. Reference letters (if possible)

Deadline: September 16, 2019

Please note that due to the large number of applicants expected, it will not be possible to communicate the evaluation results to all the candidates.
