

Fundación Biofísica Bizkaia
Biofisika Bizkaia Fundazioa

FUNDACIÓN BIOFÍSICA BIZKAIA / BIOFISIKA BIZKAIA FUNDAZIOA

OFFER – POSTDOC POSITION (3 months)

Publication date: December 17, 2018

Fundación Biofísica Bizkaia (FBB) is a center of excellence on an international level with the main aim of promoting a multidisciplinary program in the field of Biophysics and its application in the areas of Biotechnology and Health.

Description of the project

The position is associated with one of the projects of the group of Dr. Alicia Alonso specifically one devoted to: "Biophysical studies of the composition and dynamics of erythrocyte membranes to establish parameters associated with obesity in children" as part of the ELKARTEK project KK-2017/00049 EMOI "Estudios moleculares de la obesidad infantil".

Education and Experience Required

The candidates should have a PhD in Biochemistry and Molecular Biology or PhD in Chemistry. The candidate should also have a good knowledge of fluorescent techniques applied to the study of the properties of membranes.

Contact: Applicants are encouraged to send the next documentation through the Biofisika website contact page (<http://biofisika.org/contact/>), adding the following subject: [**Job Application: 38AA**]

1. Curriculum Vitae
2. Reference letters
3. Description of previous research

Deadline: December 26, 2018

Please note that due to the large number of applicants expected, it will not be possible to communicate the evaluation results to all the candidates.
