FUNDACIÓN BIOFÍSICA BIZKAIA / BIOFISIKA BIZKAIA FUNDAZIOA

OFFER – Position for a Graduated in Chemistry

Publication date: July 11, 2019

Fundación Biofísica Bizkaia (FBB) is a center of excellence on an international level with the main aim of promoting a multidisciplinary program in the field of Biophysics and its application in the areas of Biotechnology and Health, focusing all its resources in Instituto Biofisika Institutua (UPV/EHU, CSIC).

Description of the position offered

The successful candidate will integrate in the FluoroNanoTools laboratory of Instituto Biofisika, which is devoted to the synthesis of fluorinated nanoparticles and building blocks with applications in the field of molecular imaging, protein corona and encapsulation. The candidate will work on the synthesis of fluorinated polymers for nanoparticle and drug encapsulation. Additionally, those polymers will be functionalized for diagnosis by molecular imaging.

Education and Experience Required

The candidates should have a Degree in Chemistry with experience in the synthesis of fluorinated polymers and encapsulation of nanoparticles.

Contact: Applicants are encouraged to send the next documentation through the Biofisika website contact page (<http://biofisika.org/contact/>), adding the following subject: [*Job Application: 47MCarril*]

1. Curriculum Vitae
2. Reference letters (if possible)

Deadline: July 29, 2019

Please note that due to the large number of applicants expected, it will not be possible to communicate the evaluation results to all the candidates.
