

Fundación Biofísica Bizkaia
Biofisika Bizkaia Fundazioa

FUNDACIÓN BIOFÍSICA BIZKAIA / BIOFISIKA BIZKAIA FUNDAZIOA

OFFER – Postdoc position (initially one year contract)

Publication date: December 5, 2019

Fundación Biofísica Bizkaia (FBB) is a center of excellence on an international level with the main aim of promoting a multidisciplinary program in the field of Biophysics and its application in the areas of Biotechnology and Health, focusing all its resources in Instituto Biofisika Institutua (UPV/EHU, CSIC).

Description of the position offered

The successful candidate will be joining Xabier Contreras's laboratory for a period of one year initially. The candidate will study the impact that specific membrane lipids have on membrane protein activity. The candidate will use a combination of cutting edge technologies (i.e., proteomics, lipidomics) and biochemical and chemical biology techniques to unravel how lipids govern membrane protein function in living cells.

Education and Experience Required

Doctor in Biochemistry and Molecular Biology. The candidate should demonstrate strong experience in membrane biology, protein-lipid interactions, and cell biology.

Contact: Applicants are encouraged to send the next documentation through the Biofisika website contact page (<http://biofisika.org/contact/>), adding the following subject: [*Job Application: 57XContreras*]

1. Curriculum Vitae
2. Reference letters (if possible)

Deadline: December 19, 2019

Please note that due to the large number of applicants expected, it will not be possible to communicate the evaluation results to all the candidates.
