FUNDACIÓN BIOFÍSICA BIZKAIA / BIOFISIKA BIZKAIA FUNDAZIOA

OFFER – Postdoctoral Position
Publication date: April 23, 2021

Fundacion Biofisika Bizkaia (FBB) is a center of excellence on an international level with the main aim of promoting a multidisciplinary program in the field of Biophysics and its application in the areas of Biotechnology and Health, focusing all its resources in Instituto Biofisika Institutua (UPV/EHU, CSIC).

Description of the project and position offered

The Membrane Nanomechanics and Remodelling group @ the Biophysics Institute, University of the Basque Country (<http://biofisika.org>) seeks postdoctoral candidates to apply for a short-term (2 month) position. We study how cells create and maintain the complex and dynamic architecture of their membranes. We use cutting-edge nanotechnology and biophysics methods to unravel the fundamental molecular mechanisms behind membrane remodeling. More info: <https://shnyrovalab.wixsite.com/website>

Highly motivated candidates eager to engage in high-level scientific research will be considered.

Education and Experience Required

We are looking for students with a PhD in Biochemistry and Molecular Biology, Biophysics or similar. Previous hands-on experience with advanced optical microscopy.

Contact: Applicants are encouraged to send the next documentation through the Biofisika website contact page (<http://biofisika.org/contact/>), adding the following subject: [*Job Application: 82AShnyrova*]

1. Curriculum Vitae
2. Reference letters (if possible)

Deadline: May 10, 2021

* Please note that due to the large number of applicants expected, it will not be possible to communicate the evaluation results to all the candidates.
